

CAPITA

Capita Managed Hosting Services Giving You the Control of Your IT

IT Services

Lack of specialist expertise and on-going infrastructure and security issues can have a big impact on business performance. With lack of space, power and availability constraints, organisations are looking for cost-effective, secure, reliable datacentres allowing them the ability to free-up IT staff to focus on their day jobs and not spending time on unnecessary problems.

Our Proposition

Capita's Managed Hosting Services offers you a compelling total cost of ownership whilst putting you firmly back in control of your IT – freeing your IT team to focus on projects that add real value to the business.

Capita offers a compelling total cost of ownership and access to resources at the most desired locations.

Benefits

Reduced TCO – through a consolidation of suppliers, tailored hosting charges and greater economies of scale

Scalability – a tailored service enabling you to adapt to business changes to maintain your competitive advantage.

Time – enabling you to focus on the day-to-day management of your IT estate, and freeing up time for you to focus on your core business needs and requirements.

Agility – instant access to datacentre capacity to support business change.

Security – the design and production of a tailored solution that provides a holistic level of protective security commensurate to the protective marking of your information assets – ensuring they are properly protected against loss or compromise.

Why Capita?

Capita's Managed Hosting Services give you the IT resources and skills you need to ensure availability, reliability, security and cost-efficiency. We enable you to remain in full control of the systems, applications and data to drive your business forward.

Full Managed Shared Services – dedicated Service Desk, Systems Management Tools and Services, Managed Application Support – not sure what we mean by a restricted Service Desk

Dedicated Desktops and Laptops

CESG assured and certified products and technology

Multi-tenanted Design with secure access from various zones – for example internet, core platform and GSE

Dedicated client SAN storage

Secure Email Service

Disaster Recovery

Accreditation Support - utilising our in-house accredited CLAS consultancy team.

Operational Consultancy Services - firewall policy management, security group optimisation, intrusion detection and intrusion prevention (IDS/IPS) which includes 24x7 monitoring and investigation of alerts, and event and incident management.
